

(a) Target and ignore contract

I: include all

both scored

Full target

O: exclude / ignore off
prediction

FP

Filtered target; source ignores disabled

N: exclude / ignore on
prediction

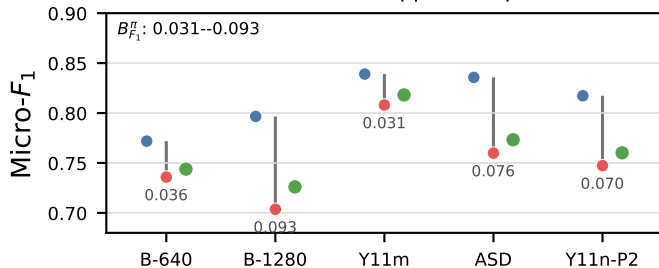

unmatched $\Rightarrow$
neutralized

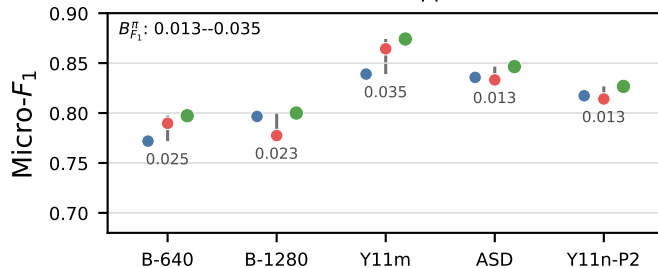

Filtered target; valid GT matched first

In I/O/N, a removed valid box is never converted to an ignore region.

(b) Absolute support: 24 px

(c) Normalized support: .015

● I: include all ● O: exclude / ignore off ● N: exclude / ignore on
