

(a) Target and ignore contract

	I: include all	O: exclude / ignore off	N: exclude / ignore on
Scored valid GT	all mapped boxes (small boxes retained)	above-threshold boxes only	above-threshold boxes only
Source-ignore regions	enabled	disabled	enabled after valid-GT matching
Below-threshold valid GT	not removed	dropped; not ignore	dropped; not ignore

Under O/N, predictions on removed valid boxes remain FP-eligible; removed boxes never become ignore regions.

(b) Absolute support: 24 px

(c) Normalized support: .015

● I: include all ● O: exclude / ignore off ● N: exclude / ignore on
